

AT KREBS BUSINESS MACHINES INC.

We lead you to Loss Prevention Success

Video cameras alone are not enough to spot theft and fraud!

Point of Sale Video Text Insertion

Stop: Cancels, No Sales, Short Rings, Substitute Scanning, Short Changing, Voids, and Returns/Refunds.

X-bob4 Video Text Inserter Operation

The Photo Sequence above shows the X-bob4 in action. With a Video Text Inserter (aka Video Overlay) installed the transaction text is inserted into the security camera video for monitoring and recording. This will allow a business owner to double check transactions and have a record of any unauthorized transactions. The business owner can spot loss to stop loss and resolve disputes.

X-bob4 is very effective in bars and restaurants as well.

X-bob4 will easily interface with most Samsung and Sam4s cash registers and point of sale systems. For larger installations ask about our Talon DVR system.

Let us design and install your complete video security system including remote viewing with smart-phones, tablets and and personal computers.
